

An Origami Shirt

		
<p>Turn your sheet of paper upside down on the table. Draw two marks halfway along the narrow edges of the sheet.</p>	<p>Fold the long edges of the paper toward the centre.</p>	<p>Turn down the top edge of the sheet and fold by about 1 cm, as shown. Make the fold tight.</p>
		
<p>Turn the sheet over. Draw a mark about 1 cm from the top, as shown. Fold the lower portion into three equal parts all the way to the mark: (a) make an initial fold at the one-third point, (b) then fold again at the two-thirds point. Make the folds tight, then unfold them.</p>	<p>Fold the upper corners of the paper so that they meet at the mark. Make the folds tight.</p>	
		
<p>Next, fold down corner 1 completely, as shown. Make the fold tight, then unfold it. Do the same for corners 2, 3 and 4.</p>	<p>Fold the two sides toward the outside; this way, the bottom part should automatically fold over the middle one. Make the fold tight for the sleeves.</p>	<p>Fold over the entire bottom part toward the top. Tuck it under the shirt collar. Make the fold tight.</p>

 = Turn the sheet over

----- = Fold line

 = Fold the sheet

 = Fold, then unfold the paper
